

About iTranslate

Born in 2009 and headquartered in Austria/Europe, iTranslate developed into a prominently featured App, from International Press to various App Stores and Television ads. Our mission is to enable travelers, students, business professionals, employers, and medical staff to read, write and speak in all languages, anywhere in the world.

iTranslate's consumer offering spans applications such as iTranslate Translator - which with over 200M downloads is the leading independent translation and dictionary app in the world - iTranslate Converse, and Typeright, the AI-powered writing assistant.

The iTranslate Translator is the company's flagship with which you can easily translate text, websites, use your phone's camera for instant translations, start voice-to-voice conversations, and even use AR for translations in over 100 languages!

Within the app's PRO version, you can find numerous new and exciting features designed to meet your translating needs!

- Our Offline Mode allows you to use iTranslate abroad in 30+ languages without having to pay expensive roaming charges. Simply download the language packs and start translating abroad!
- If you find yourself in a new city and don't speak the local language - simply use our Phrasebook feature, where you will find over 250 pre-defined phrases at your disposal for any given situation (Restaurant, Hotel - even Medical) - and it's for free!
- With the Lens feature, you can instantly translate menus, signs, or any other text around you with your iPhone's camera. Just point, snap, and it'll do the rest for you!
- The Lens feature also includes our Visual Dictionary. This fantastic new feature allows you to use your iPhone's camera to identify objects instantly and enables you to translate the word into your desired language!
- Our AR Mode is an even more interactive way to use translations in your every-day life, meaning rather than just taking a picture, you're able to move around while interacting with objects
